

Heating and Cooling Your Bonus Room

The Right Solution for your Man Cave, Media Room, Mother-in-Law Suite and More!

Home additions can be a very cost effective way to add square footage, increase the usable space and the value of your home. Bonus rooms can include guest rooms, man caves, game or media rooms, home office, home gyms, mother-in-law suites and more. You can easily make any of these rooms as comfortable as the rest of your home by installing a ductless mini-split.

Fujitsu's Ductless Wall Mounts Feature:

- Stylish design in slimmer sizes than competition
- Highly energy efficient for low utility bills
- Available in 9 through 36,000 BTU single zone models
- High performance heating at low outdoor temperatures (down to -15°F for some models!)
- Wireless remote control
- Some models feature Energy Saving Program (ESP)

ESP* knows how to save you money even when you forget. If you leave the room without turning the unit off, ESP knows that you left and 20 minutes later, set temperature is increased by 4°F when cooling and reduced by 8°F when heating. When you come back to the room, it returns to previous operating mode. This prevents wasteful operation to save energy without you having to think about it.

Ductless mini-split systems are ideal for any home addition.

Installation is as simple as 1, 2, 3...

1. Mount indoor and outdoor units.
2. Connect refrigerant and drain lines.
3. Make electrical connections.

A mess-free and easy installation for contractors saves homeowners time and money.

**Available on select models*

Features

Year-Round Comfort

Halcyon wall and floor mounts provide both heating and cooling for year round comfort. A simple push of a button on the remote control allows you to switch between heating and cooling modes.

Energy Efficient

Fujitsu mini-splits feature high efficiencies & cost very little to run. Many systems are **ENERGY STAR® Qualified**, meaning lower utility bills. Many local utility companies offer significant rebates for the purchase of high efficiency ductless mini-split systems.

Inverter Technology

It's like cruise control for your heating or cooling system. Compressors only run as fast as they need to handle the cooling or heating demand.

Super Quiet Operation

Fujitsu mini-splits provide a peaceful inside environment for sleep & study with whisper quiet noise levels down to 23 dB(A). That's quieter than a library!
