

Sunroom Comfort

Heating and cooling your sunroom for year-round use

Energy Efficient Heating and Cooling for Your Sunroom

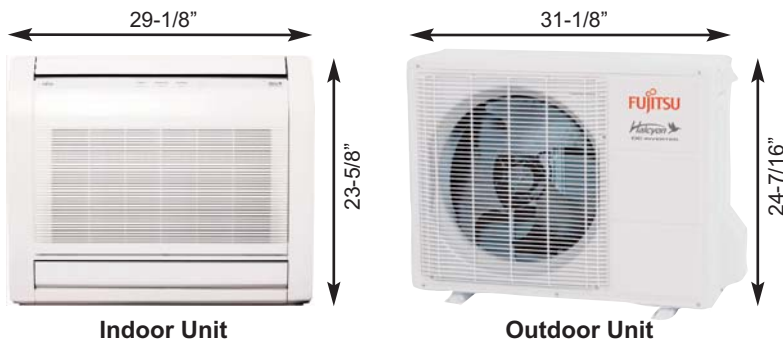

A sunroom can be a very cost effective way to add square footage, increase the usable space and the value of your home. It is designed to function as additional living area during mild weather but may be too hot or cold in the heart of summer or winter. Rather than having living space that you can only use 50% of the year, you can easily convert your sunroom to a four-season room by installing a ductless mini-split.

Fujitsu's Ductless Floor Mounts Feature:

- Stylish design in a compact size - less than 24" high
- Energy efficient for low utility bills
- Available in 9, 12, or 15,000 BTU single zone models
- Heat pumps provide both cooling and heating
- Feature twin airflow for improved heat delivery
- Designer remote control

Floor mount systems are ideal for sunrooms where upper wall space is limited.

Installation is as simple as 1, 2, 3...

1. Mount indoor and outdoor units.
2. Connect refrigerant and drain lines.
3. Make electrical connections.

A mess-free and easy installation for contractors saves homeowners time and money.

Features

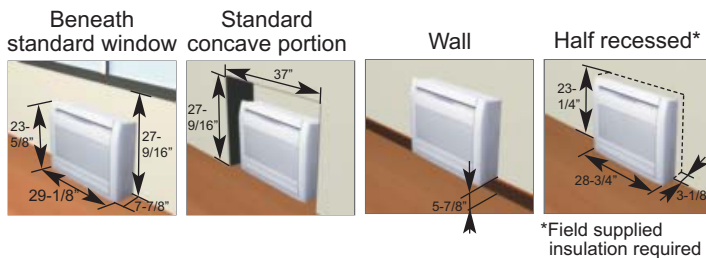

Year-Round Comfort

Revolutionary Halcyon floor mounts provide both heating and cooling for year round comfort. A simple push of a button on the remote control allows you to switch between heating and cooling modes.

Flexible and Easy Installation

Fujitsu's ductless mini-splits install quickly with little mess and disruption to your home.

Super Quiet Operation

Floor mounts provide a peaceful inside environment for sleep and study with whisper quiet noise levels down to 23 dB(A). That's quieter than a library!

Only 23 dB(A)

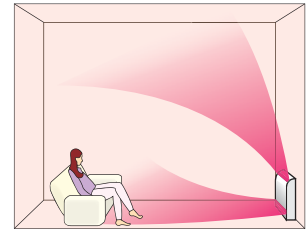

Energy Efficient

All floor mount systems feature high efficiencies and cost very little to run. They are **ENERGY STAR® Qualified**, meaning lower utility bills for home owners. Many local utility companies offer significant rebates for the purchase of high efficiency ductless mini-split systems.

2-Fan and Wide Airflow

Having both upper and lower airflow quickly warms or cools the entire room. Floor mount can be set in Dual Airflow or Upward Only Airflow if desired.

Floor Mount Systems

Heating Down to -5°F

System 9RLFF
System 12RLFF
System 15RLFF

Heating Down to -15°F

System 9RLFFH
System 12RLFFH
System 15RLFFH

Heat pumps generate high heating capacity even when it is very cold outside!
